IT – INET Nordic – Updates on the Nasdaq ITCH feed services

ITCH Unicast (TCP) and ITCH Multicast (UDP) are two Nasdaq Market Data Feed services on the INET Nordic (Cash Equity trading platform). Please visit https://www.nasdaq.com/solutions/inet-nordic-protocol-specifications for further information about these services together with other technical information.

Migration from Unicast (TCP) to Multicast (UDP) ITCH

As Nasdaq Nordics has seen a significant increase in the volume of data transmitted through our market data ITCH-feeds from the INET Cash Equity platform, Nasdaq Nordic plans to cease support for the INET ITCH Unicast (TCP) services effective **October 29, 2027**.

Moving to Multicast (UDP) will ultimately allow Nasdaq to support a more scalable and efficient data delivery environment.

We understand that migrating to a different protocol involves time and resources. We are providing this advance notice to ensure you have a sufficient runway to plan, test, and implement the necessary changes to your systems.

Available services

The INET ITCH Multicast (UDP) options to migrate to are the following:

- ITCH Multicast (UDP) Equities & Warrants (10G)
- ITCH Multicast (UDP) Equities only (1G, 10G)
- ITCH Multicast (UDP) Warrants only (10G)

Documentation

Your current INET ITCH Unicast (TCP) port setup/inventory can be found in our Member Portal.

To order INET ITCH Multicast (UDP) connections please contact DataEurope@nasdaq.com.

INET Nordic Connectivity Guidelines with ITCH Multicast (UDP) details:

- INET Production: https://www.nasdaq.com/docs/2025/09/09/Connectivity-Guideline-INET-PROD-20250909-v4.0.pdf
- INET Test (NTF): https://www.nasdaq.com/docs/2024/05/21/Connectivity-Guideline-INET-Test-NTF-20240520-v2.0.pdf

Networking protocols:

- SoupBinTCP: https://www.nasdaq.com/docs/SoupBinTCP-for-Nasdaq-Nordic-v.3.00.4.pdf
- MoldUDP64: https://www.nasdaq.com/docs/MoldUDP64-for-Nasdaq-Nordic-v.1.00.2.pdf

Other relevant documentation:

- https://www.nasdaq.com/solutions/inet-nordic-protocol-specifications#specifications
- https://www.nasdaq.com/solutions/data/european-market-connectivity

Timeline:

- Effective October 30, 2026, new INET ITCH TCP ports will no longer be available for order
- Migration to ITCH UDP to be completed before October 29, 2027
- Adjustments to ITCH TCP port fees from January 1, 2027 – communicated during fall 2026

Next steps

We encourage you to begin reviewing your technical requirements and migration plans soon. Our team is committed to making this transition as smooth as possible. For project related questions please contact dataeurope@nasdaq.com or technicalrelations@nasdaq.com.
